Liora – The Digital School Platform

Connecting teachers, learners, and organizations in real-time education

Introduction

Liora is a growing EdTech platform, but it is not like the typical e-learning platforms people often compare us with.
Most platforms today (like Coursera, Udemy, and Skillshare) focus heavily on **recorded video lessons**. Students watch videos, complete quizzes, and sometimes get a certificate.

But Liora is different.
Liora is built around **live learning experiences** — real-time classes, virtual bootcamps, and interactive training sessions. Our focus is on **connecting teachers and learners directly**, and giving teachers a digital environment that feels like a school, even if they don't own a physical one.

In simple words:

- If you are a teacher with knowledge but no school or equipment, Liora gives you one.
- If you are a student who learns better with live interaction, Liora is built for you.
- If you are a company that wants to train staff or run bootcamps, Liora makes it easy.

The Problem

- Many teachers and trainers are skilled but lack infrastructure: no classrooms, no school buildings, and no digital tools to host students.

- Many students feel disconnected in platforms with only videos. They want **real-time explanations, mentorship, and interaction**.

- Organizations spend too much building their own systems to host training and bootcamps.
- Existing platforms don't fully solve this:

- **Coursera/Udemy:** good for structured courses but too strict and mostly video-based.

- **Skillshare:** flexible but mostly creative, casual, and still video-based.

- **Zoom/Google Meet:** allow live classes but lack the full "school system" (attendance, assignments, tracking, certificates).

What Liora Is (The Core Idea)

Liora is a **Digital School Platform**.
It combines the **structure of Coursera** with the **flexibility of Skillshare**, but in a **live-first, interactive format**.

Think of Liora as:

- A **school-in-a-box**: every teacher can create their own digital school.

- A place for **students to learn in real-time** with teachers, mentors, or bootcamps.

- A system that provides everything a physical school would: timetable, attendance, projects, and certificates — but online.

What Liora Is Not

To avoid confusion, here's what Liora is NOT:

- Not just a video library (like Udemy or Coursera).

- Not just casual classes (like Skillshare).

- Not just a meeting app (like Zoom).

Instead:
Liora is a **complete learning environment** built around **live teaching + digital school tools**.

How Liora Works

- **For Teachers/Instructors**

  - Create and schedule live classes.

  - Host bootcamps and group trainings.

  - Track attendance and student progress.

  - Assign and review projects.

  - Earn income from teaching.

- **For Students**

  - Join structured classes (with schedules, deadlines, and certificates).

  - Or join flexible classes (pick sessions at your pace).

  - Get feedback in real-time.

  - Collaborate with other learners.

- **For Organizations/Teams**

  - Run bootcamps and staff training.

  - Manage multiple classrooms virtually.

  - Monitor progress and completion.

Modes of Learning

Liora balances structure and flexibility with two modes:

1. **Guided Track (Structured Mode)**

- ○ Scheduled classes (like semesters).

- ○ Attendance required.

- ○ Assignments/projects.

- ○ Certificates awarded.
  (This is for learners who need discipline, structure, and professional recognition.)

2. **Flexible Track (Self-Paced Mode)**

- ○ Book sessions with teachers when available.

- ○ Open workshops and live Q&As.

- ○ Badges/achievements instead of certificates.
  (This is for learners who prefer creativity, casual learning, or skill-building at their own pace.)

Key Features (Digital School Model)

- **Live Class Hosting** (video + interactive tools).

- **Attendance Tracking**.

- **Assignments & Projects**.

- **Certificates & Badges**.

- **Teacher/Student Dashboards**.

- **Community Spaces** for discussion and peer learning.

Vision & Motive

The true motive of Liora is **to redefine how learning happens online**.

- To empower teachers who don't have schools with a platform where they can still build one.

- To give students a space for **interactive and meaningful learning** instead of passive video watching.

- To give organizations a ready-made digital infrastructure for education and training.

Our motto:
☐ *Liora is not just e-learning. Liora is a school without walls.*

Future Growth

- **Mobile App (for easy access anywhere).**

- **AI-powered mentor matching.**

- **Analytics for teachers to measure student learning.**

- **Global marketplace for bootcamps and training programs.**

And Lots More Features

Closing Note

Liora is different because it is built around **people, not just content**.
It is where teachers, students, and organizations come together to learn in **real-time, structured, and flexible ways**.

With Liora, every teacher can own a school, every student can learn interactively, and every organization can train easily.
